### 👤 ABOUT ME

I am a person who learned to be persistent, by this I mean that I feel that I can achieve everything I set my mind to, even though it will take me a lot of dedication and introspection along the way. I know that if I stick to my guns I will achieve what I set out to do.

I am also a good listener. I always seek to leave something of value in the things I do and especially in my relationships with other people.

### 📁 IT EXPERIENCE

#### Prode Soccer

Tonic3

Together with a team of 5 persons, we made a prode online page for soccer tournaments in Argentina, Brazil and the United States, in which the user can vote for current matches on the tournament, get points and win awards depending on their country.

- Features:

PWA || SSO Google with account verification || JWT for session managment || Geolocation || CMS (CRUD Tournaments, Teams, Matches, players, awards.) || Push notifications || Custom Metrics.

- Frontend technologies used: React, Redux, Tailwind, Mui, Firebase, i18next

- Backend technologies used: PostgreSQL, NodeJs, Express, Sequelize, JWT, bcrypt, Firebase, Nodemailer.

### 📁 PROJECTS

#### E-commerce - BBT-TODO

Web application for alcoholic beverages shopping. Available features include cookie-based authentication, Google login, filters, cart, purchase history, order confirmation by mail, administration panel to control users, products and categories.

#### MY - TMDB

Single project consisting of a movie and TV show catalog web application that consumes the TMDB API. Available features include cookie-based user authentication, movie and series search, with the ability to add favorites.

### 🎓 EDUCATION

#### Cooding Bootcamp | Plataforma 5

July 2022 - October 2022

It is an intensive course of more than 3 months, with more than 800 hours, in which both programming and soft skills are worked on. During the first month, we worked with the pair programming methodology, every day with a different partner and the remaining 2 months were team work.

### 🧠 SKILLS
